REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 22,

THE REDCLIFF REVIEW . THURSDAY, MAY 18th, 1933

Number 30

Dominion Day Will be Celebrated Here This Year

Good Program of Horse Races, Bucking Contest and Athletic Events Being Arranged - Committee Appointed.

Dominion Day, July 1st, will again be celebrated in Redcliff this year, with the usual program of horse races, bucking contest, school children's sports, athletic events, novelties etc.

This was decided upon at a meeting of the Stampede association held last Monday evening and, judging from the large turnout and enthusiasm shown, the event will be in keeping with, and probably outshine all past records. Present indications are that several new and novel items will be added to the program and also some alterations made to the grounds to facilitate carrying out the program more expeditiously and add to the convenience of the spectators.

On the whole prospects are very promising for a real entertaining day's program.

The following officers were elected:

- President — E. L. Stone
- Vice Pres. — H. Dacre
- Sec. — J. E. Tarrant
- Treas. — J. S. Dodge
- Ex. Com. — G. H. Worts, R. N. Rose, J. N. Dacre, F. Baird, C. Buchholz, J. R. McKenzie, W. Campeau, R. C. Hargrave, H. Sangster, J. Delinks, G. Dixon, A. Williamson, Fred Walker, A. Dubeau, Dave Whitney, John Ellis, H. Champ, A. McKinnon, A. Fitzhery, L. R. Stone, Fred Walker Jr. and J. Dacre.

The following committee were appointed:

- Publicity — R. N. Rose, J. E. Tarrant, E. L. Stone.
- Athletics — F. Baird, H. Champ, F. Walker, J. L. R. Stone
- Stampede Program — N. Dacre, R. N. Rose, G. H. Worts.
- Dance — R. N. Rose, J. N. Dacre and H. Dacre.

S.A.R. Organizes A Soft Ball Club

Elect Officers to Carry on For This Season

At a meeting held last week the local S. A. R. formed a soft ball club and will enter the local league. The following officers were elected:

- Hon. Pres.—Major Worts.
- Hon. Vice Pres.—H. Champ
- Pres.—A. G. Osgood.
- Vice Pres.—W. Evans
- Sec. Treas.—W. Williams
- Manager—W. Campeau
- Assistant Mgr.—J. Obeac
- Coach—C. Barr
- Umpire—A. Ballantyne
- Captain—L. Larsen
- Vice Captain—J. Lownes
- Social Com.—M. Lawson, M. Collard, N. Willis, L. Larsen, J. Podesta and T. Maskell.

They plan to have a series of dances in the near future to raise funds for the season's operations.

St. Ambrose Jr.W.A. Wins The Banner

Girls Under The Leadership of Mrs. Grievs

The rural Deanery of Medicine Hat met in convention at St. Barnabas church on Tuesday of last week. The delegates from St. Ambrose, Redcliff, were Mesdames Cox, Ellis, Tanner, Johnson and Bainbridge.

The Junior W. A., under the able leadership of Mrs. Grievs, won the banner for the best attendance in the Deanery. This banner was donated several years ago by Miss Gibson, who organized the first Jr. W. A. of St. Ambrose. This is the second time St. Ambrose girls have won the banner. Mrs. Grievs, the present leader is doing a splendid work among the girls and to her the greatest credit is due for the fine interest and attendance of the members of the group.

SCHOOL NEWS

The cups and medals won by Redcliff School at the recent Music and Dramatic Festival in Medicine Hat arrived here last Saturday and nicely engraved with the names of the winners and they are now on exhibition in the classrooms for at least another year. All medals are awarded outright, but the cups remain in the winning schools until the next festival when they are up for competition again. A diploma, however, is retained in the school as evidence of having won in any particular year.

The annual Cadet inspection has been announced for Wednesday, June 7th commencing at 9:15 a.m. on the school grounds. In the case of inclement weather arrangements will have to be made to hold the inspection indoors as was the case last year. This procedure, however, would greatly handicap the cadets in their work and it is to be hoped that this year the weather will be on its good behavior. Inspections in other Alberta schools are already in progress. A picked team of sixteen smart boys has already been selected to represent Redcliff in the provincial competition in physical training for the Army and Navy. Veterans' trophy which the local boys won in 1931, and lost last year by a narrow margin of 2 points. The team will lead this year by Albert Podesta.

The high school girls have also a particularly clever physical training team this year and while there is no competition for them to enter, the inspecting officer, always interested in physical training exhibitions, has consented to observe the girls go through their gymnastic stunts.

Churches

GORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow
Sunday, May 21st.
10 a.m. Church School.
11:15 a.m. Morning Worship.
Subject: "The Reproach of The Christ".
3 p.m. Bowl.
7:30 p.m. Evening Worship.
Subject: "Pride in The Gospel".
"The hope of immortality is the best of all hopes."

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

ST. AMBROSE CHURCH

Rev. Malcolm Stewart, Vicar
9 a.m. Holy Communion.
10 a.m. Sunday School.
11st and 3rd Sundays
1st and 3rd Choral Eucharist.
2nd, 4th and 5th Sundays
11 a.m. Matins and Sermon.
7:30 p.m. Evensong and sermon.

C. P. R. TRAIN SERVICE

The summer time table on the C. P. R. is now in effect. Trains leave Redcliff as follows:
West bound at 5:20 p.m.
East bound at 8:37 a.m. and 10:01 p.m.
Lomond local, West: Monday at 8:37 a.m.; East on Saturday at 2:30 p.m.

Mr. A. W. Woodcock Passed Away Sunday

Was Pioneer of Town, Having Started First Industry

"After being confined to his house for the past two years, from ailments which are usually associated with one of his age, Mr. Arthur W. Woodcock passed away last Sunday at midnight.

During the past few years a number of those who have been classed as pioneers of the town have passed on, but in the death of Mr. Woodcock Redcliff has lost one of its original pioneers. Coming here in 1909 when Redcliff was merely so many acres on the broad expanse of prairie, he undertook to build and put in operation the town's first industry: the Redcliff Brick and Coal plant. After getting this plant in smooth running order and operating it for two years as manager he transferred his interests to the Pressed Brick plant and superintended its operations until 1925 when he retired from active service.

During his busy career and up till his retirement, he actively found time to take an active interest in all matters of church and state which had for their object the advancement of the community along social, moral, educational and business lines. When on active service it was his duty to look after the handling of scores of men and no more fitting tribute can be paid to his memory than to be able to say that he had not an enemy in the world, and that all those who worked with and under him have nothing but praise and admiration for his sterling qualities and fair dealing.

The late Mr. Woodcock was born at Oak Bay, New Brunswick in 1845. When 18 years of age he moved with his parents to Minnesota, where he grew up and resided until 1909 when he moved to Redcliff. In 1876 he married Miss Mary Jane Townsend who still survives. To them were born four children, the eldest of whom died in infancy. Their son, Freeman, lost his life with the Canadian forces at Passchendaele. Two daughters, Mrs. R. S. Dodge and Mrs. R. C. Hargrave reside in Redcliff.

The funeral took place from Gordon Memorial church yesterday afternoon, and the remains were interred in Medicine Hat cemetery.

The funeral was under the direction of the Masonic order of which deceased was one of the oldest members in Canada, he having joined "Catawba" lodge in St. Anthony, which is now Minneapolis, 67 years ago.

THE LATE A. W. WOODCOCK who died at his home here last Sunday at the age of 88 years, and who started the first industry in Redcliff in 1909.

Ronald Colman Stars At Dreamland Theatre

"Cynara," from the international stage success, is a perfect vehicle for the inimitable talents of Ronald Colman, which opens at the New Dreamland theatre Thursday.

Indeed, even the suave, urbane Colman has made few pictures more artistic and entertaining than this one. Advance reports from Hollywood and from disinterested observers told that "Cynara" far up in the list of the season's best efforts, and certainly local audiences will agree with that verdict after witnessing this film. The story, of course is made to order for Ronald Colman, and framed with the Samuel Goldwyn standard, it makes a grand human document. It is crammed full of situations that are as rare as reality and touch deep poignancy. The word "sophisticated" with regard to motion pictures has been very much abused, but here is one instance in which it must be used. For sophistication fairly sticks out of "Cynara" but, contrary to the usual story, it exerts a strong appeal for the so-called masses.

Colman is never better than in the role of Jim Warlock, the young English barrister who, much against his better judgment, is drawn by his best friend into what is called a harmless flirtation and which results in disaster for everybody concerned. Kay Francis, in the role of Warlock's young wife, gives one of those finished performances which is her wont, only this time she is better than ever. And a newcomer from England named Phyllis Barry soars to the heights of this, her first Hollywood effort. Miss Barry is bound to be in great demand because of this artistic portrayal.

Colman is never better than in the role of Jim Warlock, the young English barrister who, much against his better judgment, is drawn by his best friend into what is called a harmless flirtation and which results in disaster for everybody concerned. Former Redcliff Girl Weds at Vancouver

The Bride Was Miss Barbara Lydiatt

A quiet but very pretty wedding was solemnized in St. James Church, Vancouver, on April 17th when Miss Barbara Lydiatt, only daughter of Mr. and Mrs. Geo. Lydiatt, formerly of Redcliff, but now of Vancouver, was united in marriage to Mr. J. E. Grane, of that city. The Rev. Canon Cooper officiated. The bride, who was given away by her father, and was attended by Miss Mairi Dingwall as bride's maid, looked charming in a big suit with brown hat, gloves and shoes. Miss Dingwall's suit was in shades of rose with brown hat, gloves and shoes.

Mr. Walter Lydiatt, brother of the bride, acted as best man. The bridal party entered the church, which was beautifully decorated for the occasion with daffodils and Easter lilies, to the strains of bridal music.

After the ceremony the immediate relatives of the contracting parties gathered at the home of the bride's parents, where a dainty wedding luncheon was served.

Mr. and Mrs. Grane will make their home in Vancouver.

Margaret Pow, who has been attending Mount Royal College, and Billy Sellhorn who has been attending University, received word that they had passed all the subjects written on in their recent examinations.

Local Girls Organize A Soft Ball Club

Will Enter League With Medicine Hat

At a meeting held last Friday evening a number of girl soft ball enthusiasts decided to re-organize for this season. It was also decided that they enter the league with Medicine Hat girl teams.

A committee of Misses O. Beiler, E. Frey and manager Campeau attended a meeting in Medicine Hat last Tuesday evening for the purpose of drawing up the schedule.

The following officers were elected:

- Hon. Presidents — Ted Van Wert, L. Trembath and J. Horne
- Vice Pres. — G. H. Worts
- Pres. Pres. — J. Barger
- Sec. Treas. — E. L. Stone
- Manager — W. Campeau
- Coach — J. Podesta
- Captain — Elaine Frey

The girls have already commenced practicing and expect to be in good condition for the first game.

Mrs. Wm. Wheeler return d last week after two weeks holiday at Cherry Grove Farm where she was the guest of Mrs. Fred Smith.

Word was received in town recently announcing the marriage of Arnold Moffat a former Redcliff boy, but now of San Francisco, to Miss Marie Peterson of that city. Arnold is the manager of the city and country finance dept. for the Dunn Co.

Federal Government Economies In Reduction Of Expenditures Results In Saving Of \$81,000,000

Restraints in controllable expenditures over the last three years, coupled with the \$14,000,000 provided in the last budget, have resulted in total government economies of \$81,000,000. Hon. E. N. Rhodes, minister of finance, stated in a circular letter forwarded to all Canadian Chambers of Commerce and Boards of Trade which recently called upon the federal administration to "set a good example" in matters of economy.

"The government is in cordial sympathy with the objects you have in mind," Mr. Rhodes wrote. He expressed the opinion that all factors of the problem, in respect to government expenditures, had not been considered. Even if every salary, pension and parliamentary indemnity were cancelled, there would still be a deficit of \$26,000,000 in the non-controllable obligations, he wrote.

"Furthermore," the letter continued, "may I point out that for two years past, through action of the treasury board, promotions and increases of pay have been held in abeyance, and as vacancies have occurred in the government service the positions have been abolished. These and other restrictions have resulted in a reduction in the total charge for salaries to the wages of \$4,000,000 per annum and a reduction of over 4,000 employees. This is in addition to the saving of \$5,000,000 per annum effected by the 10 per cent reduction from all salaries and wages."

"In calling for economies, it is erroneously assumed that reduction of controllable expenditure could be made to such an extent as to balance the budget without resort to additional taxation. I submit that a deep ground sum which will indicate the impossibility of such a suggestion."

"Based upon the taxation measures in force prior to the last budget, estimated revenue for the fiscal year 1933-34 is \$287,000,000, our estimated expenditure for the same year is \$445,000,000, in which are included the following items of uncontrollable expenditure:

Interest charges, \$133,000,000.
Canadian National Railways deficit, \$25,000,000.
Pensioners and soldiers' care, \$38,000,000.

Subsidies to provinces, \$15,000,000.
Old age pensions, \$12,000,000.
Unemployment relief, \$32,000,000.

"These items are fixed and uncontrollable beyond question with the possible exception of that for unemployment relief, but, having regard to existing conditions in Canada and the inescapable demands which are made upon the Dominion treasury in this connection, this item can, I think, fairly be included. The total of the above items is \$233,000,000."

"It will thus be observed that if we were in a position to eliminate every dollar of so-called controllable expenditure we would still show a deficit of \$28,000,000. That is to say if we were in the position to eliminate approximately 50,000,000 permanent civil servants (not including casual employees); stop their superannuation payments in breach of contract; pay no indemnities to members of parliament or to senators; pay no judges' salaries; dismiss penitentiary staff; the mounted police force, all customs officers, lighthouse keepers, harbor masters, etc.; in other words, if the government were to dismiss every civil servant and close all government activities, there would still be a deficit of \$28,000,000."

Depth Of The Sea

New Deep Sea Sounding Is Made In Pacific Ocean

A new deep in the bed of the Pacific Ocean was reported in a message from the U.S.S. Ramapo, Capt. C. B. Mayo, commanding the deep-sea tanker, reported that by repeated use of the sonic depth finder, the depth was measured at 5,967 fathoms, or 33,000 feet. It was found. The message said, at latitude 30.43 north, longitude 142.80 east, which would place it directly across the Pacific Ocean from San Diego near the coast of Japan.

The new sounding approached the greatest known depth, that of 6,210 feet found in the Mindanao trench northeast of the island by that name in the Philippine group.

Freddy—'What is an iceberg, Daddy?'

Daddy—'Why, it's a kind of a permanent wave, son.'

Decrease In Fish Sales

Catch In North Georgia, But Prices Lower Hereabouts

The value of fresh fish shipped out of the Georgia district during the past season was \$23,561, according to the report of E. H. Stevenson, fishing inspector. Last year the amount received by fishermen was \$58,006. The decrease is attributed to the fact that meats and fish of the population districts are so low in price that northern fish, subject to longer freight hauls, and therefore increased over haul, cannot compete with other markets.

The catch per man this year was greater than last year, but the receipts were less owing to low prices. The total number of pounds shipped this year was 683,700, as against 920,400 last year. There were 138 licenses issued for the season of 1931-32, as against 83 in 1932-33.

Expected To Reach Hundred

Seventy-Eight Years Old Texas Man Thrives On Beans

Thomas Jaines, 78, one-time pony express rider and resident of El Paso, Texas, lives on a diet of frijoles beans and expects to live to be 100 years old.

"And if I reach that age," he declared, "I'm going to celebrate by riding in an aeroplane. I'd like to see those pilots carry the mail!" Years ago Jaines rode the express trail from Fort Davis, Texas, to Nowell, New Mexico.

SPRING IS IN THE AIR!

It's so fresh and lively in silk crepe print. It's all puffed up with its slender and light, the bottom of the spring coat smart!

It's lovely 'neath the spring coat in a vivid-red or blue and white print in the crepe silk. And you can wear it right through the summer season. It's easily made and will cost so little.

Model No. 991 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100. It is made of 36-inch bust. Size 16 requires 3 1/2 yards of 36-inch material. Plain crepe silk in grey, dawn blue or the new orange shade is delightfully attractive in this design. Price of pattern 20 cents in stamps only (coin is preferred). Wrap cloth carefully.

Education and Economy

Carrying Over to the Point Where Knowledge Education Is Desired The Seattle Post-Intelligencer reports that in 15 out of the 48 states in the American union, public schools have been closed and no other provision has been made to continue child education.

In 40 states, school terms have been abridged to save money, and thousands of children have been deprived, to the extent of the abridgement of educational opportunities that should be theirs.

In 35 states, the teaching staffs have been reduced to the point where classes are overloaded and can not be taught properly.

In sum, concludes the Post-Intelligencer, the whole public school system of the nation faces an imminent breakdown, the disastrous social and moral effects of which will be felt for a generation. The newspaper concludes by denouncing the "false economy" of savings ignorance, poverty and crime."

All economy in educational affairs is not, of course, false economy. There can and should be true economy, an elimination of extravagance and waste, a pruning away of harmful and unfruitful expenditures. But in economies, as in extravagancies, there is a limit, and beyond that limit there is a danger of running to extremes, and there is a real danger, in Vancouver as in the cities and towns across the interior, that in the name of economy, the rights of the rising generation shall be lost.

And it is not leaving them all the problems enough for that. Transgression of heritage of debt, which we didn't inherit but created. We must leave them, if we are to be fair, all the facilities possible for solving the problems we are throwing at them. And we are not leaving them all the facilities possible if we give them fewer educational advantages than we can by hook or by crook, provide, Vancouver Province.

Salvage Job Too Costly

Relating Sunken German Fleet Proved Too Great a Problem

The story of the raising of a portion of the German fleet sunk by German crews at Scapa Flow was told to Manchester members of the Institution of Mechanical Engineers by Mr. F. Cox, head of the salvage firm which undertook the operation.

It cost the firm about £600,000, and Mr. Cox, who they lost much money by it. Vessels were sometimes upended, and in one instance the divers reported that they destroyed a large two lying crosswise over a third. A battleship like the Hindenburg could not be lifted by gear, so they closed up the holes in the vessel and pumped out the water until the float.

One problem was how to locate the valves which the Germans had opened to sink her.

The valves once located, it was no easy job to put on patches. The divers had to search the sides of the vessel thoroughly for holes and had to put on 800 patches. One of the patches cost £1,000. It was not until three days later they were able to bring the Hindenburg to the surface in a stable position without a dangerous list.

London had a fog which was practically continuous from November, 1879, to February, 1880. It was the worst period of fog ever recorded there.

White horse leather shoes will be in vogue in Italy this spring.

GRAND OLD DUKE REVIEWS BRITISH SAIZORS

When it comes to sport and amusement the depression seems to be scarcely noticeable.

Only One Way Plain citizens are struggling to keep up their commitments and meet their responsibilities on much depleted wages and incomes. Economies is forced upon the private purse and it must be upon the public spending. There is no other way out of our civic problem than by cutting the expenditures to the people's capacity to pay.—Brandon Sun.

Chair Of Adversity That has a definite promise of \$12,000 towards the establishment of a chair of advertising in a normal university was announced by Thomas Coombe at a public club luncheon in Leeds, England. Coombe has been working on the project for some time, and he hopes to have the course at the University of Leeds.

Banana Grow On A Tall Plant, which is really an overgrown herb.

Building More Active Construction activity for April was again up to the standard of the January, February and March, according to figures compiled by MacLean Building Reports, Limited. Contracts awarded throughout Canada for April totalled \$6,608,700 as compared with \$5,191,600 in March and similar amounts for January and February.

Part Agriculture Roughly one-half of Canada's national export trade, the most important items being grain and grain products, cheese, live stock and live stock products (principally meat and hides), potatoes and apples.

Of all the myriad voices with which singing appears in mankind, none is more generally beloved or more widely recognized than the return of the birds. Among our waterfowl, the most conspicuous is undoubtedly the Canada goose or "honker." Travelling by day and by night over town and water country in wedge-shaped flocks led by birds of prey experience these birds of the wild are strikingly emblematic of spring. A few Canada geese winter in the southern coastal parts of the Dominion such as southern Nova Scotia and south-western British Columbia but most of them spend the winter in some part of the United States. There are large wintering grounds on the shores of the Carolinas, around the Gulf of Mexico, and in California. From these areas the geese begin to move northward in February. They do not migrate in a straight line, but at various suitable places in the settled regions of Canada in March and north, which await the breaking of the ice by the more northerly waters along which they will nest.

In both Canada and the United States there are many birds, as well as all other waterfowl, perform their spring migration in peace and safety from shooting because of the protection that is afforded them by the year by a treaty between the two countries known as the Migratory Birds Convention. The administration of this treaty is the joint responsibility of the Department of the Interior and the Royal Canadian Mounted Police. In the last year, the birds have a host of natural difficulties and dangers, such as storms, food scarcity, and drought.

Of course the Canada geese are by no means alone as the feathered hordes of spring. Pressing eagerly forward to reclaim the land, they are freed from retreating winter are a great host of other birds, both waterfowl and land birds, and song birds or insect-eaters of a great variety. One of the earliest and most familiar of the song birds is the robin. In the joyous song of the robin, the bird is the first to be heard from the top of some leafy maple long before the ice and snow have left us. Other early arrivals among land birds are the crow, the various kinds of blackbirds, and the humble songbirds. The simple cheerful song is undoubtedly most appreciated in early spring before it is drowned in the chorus of more gifted voices.

Although the birds that lead the way are most eagerly welcomed as messengers of spring yet the fact is that the birds that lead the way in the south Canada continue to grow like a swelling tide through the month of April. The birds that reach its height well about the middle of May. Typical and conspicuous birds among these later arrivals are the Canada warblers, the gold finches, the circle about overhead in pursuit of their insect prey; the orioles whose yellow and scarlet notes bring them to the attention of all; and the bobolinks which by their madcaps in ecstasy over the greenening meadows, denouncing them with their wonderful songs. Birds such as these, arriving in Canada when the weather has become more settled, generally return on a rather neat schedule arriving about the same time each year. It is interesting to note that the time of their return has a more direct relation to the state of development of vegetation and of insect life in the region than to the man-made calendar and mankind will never come to wonder at the instinct that brings the bobolink back north from far-away Brazil at just the right time to avoid April snows and starvation on the one hand and to help prevent an undue increase in the numbers of weeding insects in the grasslands on the other.

Building More Active Construction activity for April was again up to the standard of the January, February and March, according to figures compiled by MacLean Building Reports, Limited. Contracts awarded throughout Canada for April totalled \$6,608,700 as compared with \$5,191,600 in March and similar amounts for January and February.

TENDERS RESIGNATION

Hon. J. R. Cooke, chairman of the Ontario Hydro-Electric Power Commission, who has placed his resignation in the hands of Premier Henry. The resignation has not been acted upon.

Uses Of Wood In Canada A Considerable Proportion Is Still Used For Fuel Purposes According to figures compiled by the Forest Service, Department of the Interior, the use of wood for firewood still continues to be one of the main uses of wood in the Dominion; 30.7 per cent. of the wood cut is consumed in this way. The volume of wood that goes to the sawmill is still greater, by almost one-quarter, constituting 38.2 per cent. of the total quantity of wood cut. Third in importance among the uses of wood, in respect of volume of wood used, comes pulp-wood; 24.2 per cent. of the consumption of wood goes for this purpose. The quantity of wood utilized for railway ties makes a separate total; 11.7 per cent. of the total quantity of wood, and as much as 2.5 per cent. of the total of 5.75 per cent. for all ties. Fences still require a considerable amount of wood—about one and one-half per cent. of the aggregate, and pole piling, and similar products form one-half of one per cent.

Reclaiming Snyder Zee Work In Holland Will Take Twenty-Five Years The work of reclaiming Holland's Snyder Zee will probably require 25 years. V. J. P. de Boer, who is director of the project, said recently while in London. The new land will ultimately be used for agricultural purposes but it will at first be used for pastoral purposes and later turned into crop-growing land.

Approximately 800 persons already live on the reclaimed land, and approximately one-third of the area is under cultivation. Work will be provided for 3,000 persons when the project is completed, Kuffner said.

The Snyder Zee is being enclosed by a dam about 20 miles long. Within the enclosure will be embanked 700 parts called polders, from which the sea will be pumped. The main dam already has been completed, and the first polder probably will be finished next year.

Flour Milling In Canada The most important manufacturing industry connected with food crops in Canada is flour milling, which dates back to the settlement at Port Royal (now Annapolis, N.S.) in 1605.

When it comes to sport and amusement the depression seems to be scarcely noticeable.

Only One Way Plain citizens are struggling to keep up their commitments and meet their responsibilities on much depleted wages and incomes. Economies is forced upon the private purse and it must be upon the public spending. In both Canada and the United States there are many birds, as well as all other waterfowl, perform their spring migration in peace and safety from shooting because of the protection that is afforded them by the year by a treaty between the two countries known as the Migratory Birds Convention. The administration of this treaty is the joint responsibility of the Department of the Interior and the Royal Canadian Mounted Police. In the last year, the birds have a host of natural difficulties and dangers, such as storms, food scarcity, and drought.

Of course the Canada geese are by no means alone as the feathered hordes of spring. Pressing eagerly forward to reclaim the land, they are freed from retreating winter are a great host of other birds, both waterfowl and land birds, and song birds or insect-eaters of a great variety. One of the earliest and most familiar of the song birds is the robin. In the joyous song of the robin, the bird is the first to be heard from the top of some leafy maple long before the ice and snow have left us. Other early arrivals among land birds are the crow, the various kinds of blackbirds, and the humble songbirds. The simple cheerful song is undoubtedly most appreciated in early spring before it is drowned in the chorus of more gifted voices.

Although the birds that lead the way are most eagerly welcomed as messengers of spring yet the fact is that the birds that lead the way in the south Canada continue to grow like a swelling tide through the month of April. The birds that reach its height well about the middle of May. Typical and conspicuous birds among these later arrivals are the Canada warblers, the gold finches, the circle about overhead in pursuit of their insect prey; the orioles whose yellow and scarlet notes bring them to the attention of all; and the bobolinks which by their madcaps in ecstasy over the greenening meadows, denouncing them with their wonderful songs. Birds such as these, arriving in Canada when the weather has become more settled, generally return on a rather neat schedule arriving about the same time each year. It is interesting to note that the time of their return has a more direct relation to the state of development of vegetation and of insect life in the region than to the man-made calendar and mankind will never come to wonder at the instinct that brings the bobolink back north from far-away Brazil at just the right time to avoid April snows and starvation on the one hand and to help prevent an undue increase in the numbers of weeding insects in the grasslands on the other.

Building More Active Construction activity for April was again up to the standard of the January, February and March, according to figures compiled by MacLean Building Reports, Limited. Contracts awarded throughout Canada for April totalled \$6,608,700 as compared with \$5,191,600 in March and similar amounts for January and February.

Part Agriculture Roughly one-half of Canada's national export trade, the most important items being grain and grain products, cheese, live stock and live stock products (principally meat and hides), potatoes and apples.

Of all the myriad voices with which singing appears in mankind, none is more generally beloved or more widely recognized than the return of the birds. Among our waterfowl, the most conspicuous is undoubtedly the Canada goose or "honker." Travelling by day and by night over town and water country in wedge-shaped flocks led by birds of prey experience these birds of the wild are strikingly emblematic of spring. A few Canada geese winter in the southern coastal parts of the Dominion such as southern Nova Scotia and south-western British Columbia but most of them spend the winter in some part of the United States. There are large wintering grounds on the shores of the Carolinas, around the Gulf of Mexico, and in California. From these areas the geese begin to move northward in February. They do not migrate in a straight line, but at various suitable places in the settled regions of Canada in March and north, which await the breaking of the ice by the more northerly waters along which they will nest.

Spring Migration Of Birds From The South Herald Return Of Warmer Weather

Just Human Nature

Big-Saw Puzzles Old People Chance To Fumble

Big-saw puzzle addicts are "humblers" in the opinion of Dr. Thaddeus L. Bolton, head of the department of psychology at Temple University, Philadelphia.

But they may be consoled, for most of the great men and women in history have been "humblers." The solutions to some of the greatest world problems were found by "fumbling," Dr. Bolton said.

"The big-saw puzzle," he said, "is just a device that calls out in greater vigor the process of fumbling in random fashion. The big-saw puzzleers are persons with more than ordinary ideas if temporary, disposition to fumble around and take chances until someone reveals a step."

"The craze for the puzzle is a response to this disposition in human nature. The master of fumbling is a most unusual and diverting attraction. One-half of the world is held in bondage to the fascination of looking for the solution. The big-saw puzzleers are persons with more than ordinary ideas if temporary, disposition to fumble around and take chances until someone reveals a step."

"Puzzling is a problem-solving process. Life is made up of problems. Those who solve the greatest problems solve the highest puzzles."

Alberta Issues Tourist Book

Shells Beauty and Grandeur Of Famous Holiday Resorts

"Masterpieces of Nature" is the title of a new booklet of photographic reproductions of bits of grandeur in Alberta, issued by the publicity commissioner of the Alberta Government, Colin G. Innes.

There are 16 plates of scenic Alberta in the booklet, bound in an attractive cover of black and gold. The enchantment of Waterton lakes, the beauty of Banff National Park and the grandeur of Jasper and a few words about the province itself are shown. The booklet, it states, is intended to indicate to those of the outside world something of the beauty and the grandeur for which Alberta's holiday resorts are justly famous.

The black and gold color scheme is carried through the booklet, in borders and in the photographs. It was printed by the Alberta King's Printer, W. D. McLean.

AMUSEMENT

Frequently young people in smaller towns complain that there is nothing for them to do along the line of amusement during their leisure hours. This may in many cases be true but in almost every instance it is largely their own fault. Too many young people today appear to think they must have everything done for them, instead of taking hold themselves and creating their own amusement. True, all are not interested in the same line of what they call amusement, but with the proper interest and enthusiasm in any line it can be made a success.

During the past few weeks several meetings have been called here for the purpose of organizing different lines of sport for the summer, and a very noticeable feature of those meetings has been the lack of interest shown in them by those in whose interests they were mainly called.

Despite this, however, fairly good progress has been made and there is every indication that so far as outdoor sport is concerned this coming summer, Redcliff will be fairly well supplied. There will be football, boys and girls soft ball, in each of which Redcliff will be represented in an inter-city league. There will also be several tennis courts in operation and in due season the swimming pool will be opened. Now there is also a prospect of having a cricket club for the older element.

To make any of these successes they should be, a certain amount of ground work is necessary. In good times, when money is plentiful this ground work can be bought and paid for in cash, but under present conditions most of this can be done by volunteer help for a start at least.

"Let us then be up and doing" and thus solve the amusement problem.

THE LATE MR. WOODCOCK

The passing of Mr. A. W. Woodcock removes from our midst one who can quite properly be referred to as the father of Redcliff. And those who worked with him and for him together with those who had so much to do with the pioneer days of the town, feel proud and honored to look upon him as holding that revered and respected distinction.

The late Mr. Woodcock was a gentleman of the old school. Possessing those qualities of unswerving integrity, absolute fairness, courtesy, kindness and tolerance, he won the admiration, confidence and respect of all with whom he came in contact.

The passing of such a character is a distinct loss to any community or country.

A review of Mr. Woodcock's many activities since coming to

Redcliff is another reminder of the great debt we, today owe to the pioneers of this western portion of Canada.

Here and There

Another sale of salmon analogues is announced in New Brunswick. The famous waters of the Upriver Salmon River will be leased to the highest bidder at a sale to be held in Fredericton, April 27. The leases will be for ten years from March 1, 1935.

Canadian railway salaries have experienced severe cuts over the past few years. This has been applied to officers as well as to workers on the trains and along the lines. The recently issued annual report of the C. P. R. announced that E. W. Beatty, Chairman and President of the C. P. R., had instituted a special cut of 15 per cent. for himself and the Company's directors. This makes a total cut of 25% for them since the decline in earnings began.

Nipigon River's famous speckled trout don't know it yet, but the ukase has gone forth that non-residents shall pay only \$5.00 for an annual fishing license, or about the same as the bilharzia. Further, Nipigon guides will offer service this year for \$22.00 a week as against \$25.00 in 1932. These trout in the Nipigon pools and in those off the islands at its mouth including St. Ignace, run to seven pounds and up.

Canadian Pacific liner Empress of Japan recently hung up a new speed record when she travelled the 2,329 miles from Honolulu to Victoria in four days, eight hours, and three minutes, clipping seven hours, 47 minutes from her best previous time for the voyage and much outdistancing the best mark for any other Pacific liner except the Empress of Canada.

The literary hit of the year has been made by Frederick Niven, Canadian author, living near Nelson, B.C., whose "Mrs. Barry" has been recently hailed by authorities as one of the most profound and morose books ever written. Niven, who thus breaks into the ranks of best sellers, writes in the century handled baggage and freight for the Canadian Pacific Railway at Nelson.

H. P. Mathews, general manager, Canadian Pacific hotels in western Canada, with headquarters at Winnipeg, has been promoted general manager of the company's hotel system from coast to coast, with headquarters in Montreal, according to a recent announcement by R. W. Beatty, chairman and president of the railway.

It is necessary to go back to the year 1922 to find revenues of the Canadian railways on a level comparable with 1932. The following figures show that in 1932 as compared with 1921:

Railway Operating Revenues	Increased 5.9%
Railway Operating Expenses	Increased 20.9%
Net Revenue from Railway Operations	Decreased 50.6%
Railway Tax Accruals	Increased 135.7%
Net Railway Operating Income	Decreased 58.3%
Railway Property Investment	Increased 24.4%
Rate of Return on Investment	Decreased 69.9%
Revenue Freight Ton Miles	Decreased 28.3%
Revenue Passenger Miles	Decreased 50.3%
Actual Gross Ton Miles	Decreased 27.5%
Payroll of Engine and Train Service Employees and Telegraphers	Increased 31.2%
Train Miles	Decreased 23.9%

Had Extraordinary Career

Solomon, King Of Zulus, Was Most Powerful Ruler In Africa.

Solomon, the King of the Zulus, is dead. He was only 31. He leaves 64 widows.

He was the most vivid black man in Africa, and he had modern ideas. The Government allowed him 45,000 a year, and this enabled him to indulge in his ruling passion—motor cars.

He was the first native to buy a motor car, and after the joy of possessing one nothing could hold him back. He bought car after car—Rolls Royces, Hispanics, Cadillacs, Packards. He insisted on a white chauffeur, and he loved speed.

He bought so many cars at one time that he fell in debt. That rather curbed his passion, and he had only six cars at the time of his death.

King Solomon always held his court dressed in an ornate courtier's cap, a blue suit with gold braid trimmed with leopard skin and a leopard skin girdle. He carried a large sword, and had hundreds of them. If he could not carry a sword he carried an umbrella.

Litigation was another great love. At the slightest excuse he would sue for his favorite lawyer—a white man—and once a lawsuit. He lost many, and once, when he won a libel action, he declared a national holiday among his people.

A favorite recreation was shopping in Durban. He had such a head reputation among the white traders, however, that they always refused to give him credit. When he had enough cash he would first buy a car, then a gaily uniform, and then a sword—or an umbrella.

On one of these shopping expeditions he saw a porcelain bath. He had never seen a bath before, and he used it to be explained to him. His chauffeur said that it was a ceremonial to one of his eight kings.

There it was installed in the royal hall, and every night and morning Solomon seriously took it and was watched by his awe-stricken wives.

Wherever he went the natives flocked around him, cheering and hailing him as their king. Whenever he visited a town the natives would leave their work and run to his car.

After that time he was able to do as he pleased. He was allowed to take the main streets, and his adoring subjects held up the traffic.

Solomon was the most powerful native in Africa. He despised the ways of his great ancestor Cetewayo, who fought the British, yet he had a great army in a year. He was converted by a missionary.

At the death of this king, who had the intellect of his fathers, and dressed himself in European military comedy clothes signified the passing of the last influential native ruler.

An Old London Paper

Issue Of June 1771 Found As Swift Current

Copy of an old London semi-weekly newspaper, the St. James Chronicle, dated June 24-27, 1771, has been found at Swift Current.

The front page, centred by a crest of King George IV., carries personal items regarding the royal family. Note is made that his majesty had been riding until 2 o'clock when he returned for dinner and that the queen and princesses went out riding in post coach and four and returned to the lodge.

The issue also records a speech by President Adams to the United States Congress delivered in April, 1771.

Centenarian Tree Saved

Bournemouth, England, has saved the famous centenarian tree, which has been the glory of Bournemouth Avenue. The street runs beneath its branches and many motorists wish it removed because it interferes with traffic. The city council has ruled that the tree shall stay, and motorists must run to its foot.

To Celebrate With Whiskers

Devil's Lake, North Dakota wishes all men to grow full beards to add a little color to a golden jubilee celebration in July. Pike Chief H. W. Hofferster announced his men would have the job of inspecting everyone to see that each male citizen complies with the regulations.

Trains from London to Edinburgh have photographs and play records describing points of interest on route for passengers.

THE ITALIAN PLANE WHICH BROKE THE WORLD'S RECORD

Here we see mechanical pushing the seaplane away to the hangar after it had been piloted to a new world's speed record of 437 miles an hour over Lake Garda, Italy. The Italian pilot Agnelli, who achieved this remarkable feat, is the last of six daring aviators who have striven to capture the speed honors from Great Britain. Five of them have lost their lives in previous attempts. The British record set two years ago by Lieutenant Staniforth was 408 miles an hour.

Japanese Minister To Canada

Representative Of Mikado Is Very Popular At Ottawa

I. M. Tokugawa, for four years Japanese Minister to Canada, has gone to Tokyo on six-month leave of absence. Before being designated by the Mikado to Ottawa, he served his country at its legations in China, England, Australia and New Zealand.

Under fifty years of age, alert, sophisticated, courteous, he is a diplomat who was his way into the hearts of foreign people by a quiet dignity, courtesy manners and a slow smile.

Very popular among the diplomatic corps at Ottawa, of which he is the head, he is persona grata with the Canadian official world. Evidently from the Governor-General and Prime Minister down thinks well of him. He is especially welcome at social functions, and is justly celebrated for his own hospitality. At home in Japan he is an aristocrat of the aristocrats.

The son of Prince and Princess Tokugawa, his wife is sister to Prince Tadashige Shimadzu, and by marriage to the Empress of Japan. Mrs. Tokugawa remained at home to superintend the education of three children. His eldest daughter, Miss Togo, who has been with the minister in Canada, accompanies him home. His son may return with him for a visit at Ottawa.

For two and a half centuries, until 1867, says Ottawa Journal, the head of the house of Tokugawa was the Shogun of Japan. Explaining this post, the Minister has spoken of it as a sort of hereditary prime-minister-shogun. The Emperor resided then in Kyoto, and the Shogun in Tokyo. The present imperial palace in Tokyo, in fact, was the residence of the Shogun, and it was there the Minister's father, Prince Tokugawa, was born when his father, the Minister's grandfather, was serving as the last of the Shoguns.

In 1867 all the authority of government was returned to the Emperor, but the Tokugawa family continued to deserve and enjoy rank, honors and high prestige. Prince Tokugawa is president of the House of Peers and a power in public life.—Toronto Mail and Empire.

Use Waste Gas

Absorption Plant At Turner Valley Put Into Operation

The absorption plant of the Royalite Oil Company, built as an addition to its refining plant, was put into operation in Turner Valley, Alberta's leading gas and oil field recently. G. Coult, superintendent, announced that the plant is capable of taking 100,000 cubic feet of "tail" or waste gas was passing through the equipment with an undetermined amount of gasoline being extracted.

The "tail" gas was previously allowed to burn as waste.

Easy To Prove

It may be hard to believe, but it is true that

12 x 9 plus 2 = 11.
12 x 9 plus 3 = 11.
12 x 9 plus 4 = 11.
12 x 9 plus 5 = 11.
12 x 9 plus 6 = 11.
12 x 9 plus 7 = 11.
12 x 9 plus 8 = 11.
12 x 9 plus 9 = 11.
12 x 9 plus 10 = 11.
12 x 9 plus 11 = 11.
12 x 9 plus 12 = 11.

Farm Machinery In Australia

In the last 15 years the value of agricultural machinery in Australia has trebled. It is now worth \$180,000,000. This increase has enabled farmers and pastoralists to till 16,000,000 acres more land with at least 50,000 fewer farm workers.

The King's Sons

Contrary To General Opinion They Are Always Busy

A very large number of the Royal family these days is the Prince of Wales, who is taking a very prominent interest in various schemes to promote employment and to alleviate the lot of the unemployed.

Charities for the unemployed are receiving his enthusiastic support, and he has recently undertaken a lengthy series of provincial tours to study unemployment relief schemes at first hand. His appeal to the public to help the unemployed by "personal service" is widely placed throughout Britain.

Then there is Prince George, the King's youngest son, who is very enthusiastic about his new job as a factory inspector attached to the Home Department. In recent weeks the Prince has inspected several factories with the thoroughness of an expert.

Of King George's two other sons the world seldom hears about the Duke of Gloucester, the third son, who has taken up soldiering as a career, while the Duke of York, the second son, a married man, with two children, devotes a good proportion of his time to industrial warfare work.

How Times Have Changed

Scene Old Age Went Out Of Fashion With Arrival Of Japs

Observing that "lovely, serene old age" went out of style with arrival of the Japs, Dr. Louis Anspacher, political scientist and economist, in lecture at Chicago recently, said: "Statistics prove that more dye and make-up were sold in the last few years than were used for henna paint in the whole history of the republic."

More Cows Than People

New Zealand has more cows than people, according to a livestock census which has just been completed. At the time of the compilation there were 7,702,000 dairy cows and only 1,500,000 residents. In a year the number of bidders increased by 100,000. Only one of every five pounds of butter produced is eaten in the country.

Registration of Private Automobiles in Great Britain in a recent month were 60 per cent. greater than in the corresponding period of 1931.

A Trusting Machine

An automatic machine has appeared in England which sells paper towels to customers first and collects the money afterwards. It was found that most people washed their hands first and then began to hunt through pockets with wet hands for a coin for the towel machine. The new machine has been made on the assumption that most people are honest.

A Dollar Goes Farther Now, But It Doesn't Come Back So Quick.

Leads World In Fatalities

Accidental Death Rate Is Highest In United States

"The Unlucky Any More." The United States, according to reliable reports, leads the civilized world in its accidental death rate," says Miss Dorothy Kallen, editor of the Baltimore Health News. The accidental death rate in the United States was 80.8 per 100,000 of population in 1930. For Canada the rate was 68.6, the next highest, she pointed out.

"It is true," she continued, "our country has more automobiles, more machinery and more hazards of various types than other countries have, but apparently we have not made adequate preparation for safeguarding this equipment. Accidental deaths have increased from year to year, reaching their peak in 1930. The year 1931 showed a slight decrease from the year 1930."

Chinese Arts and Creeds

Adherents Of Islam Are In Majority In Nanking, China

"The Nanking Correspondent of the Christian Science Monitor says it is not often realized how large a part Mohammedanism plays in China, and statistics compiled by the Nanking municipality show that more adherents of Islam are enrolled in the capital than those of any other religion. Professing Mohammedanism number 20,766, whereas Buddhists, the predominant religion of China, claim only 23,810. Protestant Christians number 2,140, Taoists 269, Catholics 135. A majority of government workers in Nanking do not profess any religion, but are adherents of Confucianism, an ethical cult. A large number enroll themselves as "agnostics."

Escudor Claims Industry

Informa The World They Make All

Escudor has become Panama's hat-conscious and walks everybody to know that the hats, worn by native Panamanians, are made in Escudor, and that in Panama, from which country they take their names. Letters sent abroad by the Escudor postal service are stamped with rubber stamps telling the world about the hats that have made Panama famous. Letters addressed to the United States and other English-speaking countries bear a legend inside a heavy box border reading "Panama hats are made in Escudor."

Other stamps used on letters to other destinations impart the same information in Spanish, English, French, Italian and German.

Breaking The Ice

Two Englishmen found that New York had set side by side on deck chairs without exchanging a word. On the third day one of them fell asleep and his book came down on the deck with a thud. It also broke the ice. The other man picked up the book and the following dialogue took place: "Thanks very much." "Going across?" "Yes."

Recognized "Last Post"

During the funeral of a colonel in the British Army, England, recently, the "Last Post" was played by bugles some distance away a city cart horse heard the strains with ears pricked up and refused to move until after the last note. Inquiry disclosed that the animal had been in Flanders during the World War.

Resume Steamship Line

Canadian National steamships will re-utter the North Atlantic steamship trade next month, provided the demand for cattle space additional to that already available on the St. Lawrence route is maintained.

The Survey Photographic Library

The photographic library of the Topographical Survey Department of the Interior, contains approximately 60,000 air photographs and about 200,000 ground photographs indexed as to locality and subject.

Called a "noiseless hammer," a

bolting device in Germany forces a nail through a metal channel as pressure is applied with the aid of a handle.

Design Has Been Changed

Locomotive Now Made Long Run

Only a few years ago it was necessary to change locomotives on passenger runs every 100 or 150 miles, but today they are locomotives hauling main line passenger trains that have continuous runs as high as 800 miles. This is the result of changes in design and the use of steel alloys in wearing parts, mechanical lubrication of grease, instead of oil in lubricating parts, and the introduction of superheaters to increase steam pressure and of auxiliary engines, known as boosters, to increase power output, much to the disadvantage of the locomotive. Like automobiles, locomotives have been streamlined, and a 1918 model locomotive on the tracks today would look as odd as a 1918 model automobile would look on the highway.

Difficult To Believe

More Than Half Canada's Population Under 35 Years Of Age

It is difficult to believe that more than half the people in Canada are under 35 years of age. But such is the fact according to the Dominion Bureau of Statistics, which reports that out of a population of 10,076,786 at the last census, 5,331,991 are below the age named.

"That circumstance is both the weakness and the strength of the country. The proportion of citizens under 35 is exceptionally high, and provides a lack of experience and stability. On the other hand the potentialities are enormous. And it is upon the older people—the men in the Federal and provincial parliaments, the men at the head of the universities, colleges and training schools of all kinds, the men at the head of big business—who have to direct affairs so that the young generation may be wisely educated and trained to make a success of their lives and make this country a better place to live in every year."

With such a number of young people in the Dominion a great responsibility rests upon those who are older. —The Times-News-Journal.

Gardening Notes

By Gordon Lindsay Smith

A supply of stakes of various heights will be found very useful in both the flower and the vegetable garden. Two driven into the ground on either side of a clump of pansies, with a wire joining the top will give splendid support to Delphiniums, Gladioli, Phlox and such fairly tall growing things which, if not supported, are almost sure to be tumbled about by a heavy summer rain.

Striking should be made early in the spring, just after growth starts. Gradually the upper foliage will grow all around wires and stakes, thus hiding them, but at the same time long supporting. In certain cases where the stems are straight and the blooms very heavy, such as with Peonies, it may be advisable to make the joining wires in the shape of a hoop. Very tall, straight-stalked affairs like Hollyhock, Cosmos and Dahlias will be strengthened by one, four or five foot stakes, driven close beside and tied loosely about every foot to the main stem.

Ordinary cedar, pine or bamboo wood makes good staking material, and also very good galvanized wire. Something new in this line has recently appeared on the market. This is a new wire with knobs about six inches, like some Irish walking stick, which prevent tied strings from slipping. It is as rigid as wood and about as cheap but has the traditional advantages of being more easily driven and removed and of indefinite life. Painted a brown or green, half-inch steel stakes are very inconspicuous.

Some Flower Seed—Some hardy annuals and some about six inches, like some Irish walking stick, which prevent tied strings from slipping. It is as rigid as wood and about as cheap but has the traditional advantages of being more easily driven and removed and of indefinite life. Painted a brown or green, half-inch steel stakes are very inconspicuous.

How to get to SLEEP

When you can't sleep, it's because your nerves won't let you. Don't waste time "counting sheep." Don't lose all your needed rest in reading. Take two tablets of Aspirin, drink a glass of water—and go to sleep.

This simple remedy is all that's needed to insure a night's rest. It's all you need to relieve a headache during the day—or to dispel all other pains. Get these Aspirin tablets and you will get immediate relief.

Aspirin dissolves immediately gets to work without delay. This desirable speed is not dangerous; it does not depress the heart. Just be sure you get Aspirin tablets.

CHAPTER X.—Continued.

For a moment, groping about to rectify the blunder, Buzard, hardly knew what to say or do. "There had been no mistake; he had seen that incident with his own eyes when he glanced through the window to find where Alan was. He debated whether to draw back from his statement or to plunge ahead and tell the rest of it—Joyce's momentary battle, the shoulder that swept her whole body into the room, the quick binding tears that she dashed away.

He thought: "Better not get any deeper into this. It's only blurred again. Better back out entirely!" He stammered: "I might have made a mistake. I might—uh—it might have been the wrapping paper. I just nearly saw her put—uh—something into—and I jumped to conclusions. Must have been the wrapper. Why would any person want to keep a gift like that? Let's forget it!"

His tones carried no conviction. He realized it himself. Alan disbelieved him. Alan knew Joyce had turned the scarf he gave her.

Cursing himself hotly, Buzard looked out across the purpling river. He had meant only the best, but he had dealt Alan a savage surprise blow. After a little time Alan said to him:

"You'd better go up, Buzard; she may be waiting for us."

"Are't you going?"

"No—not now; I don't much care . . . I don't want to."

"Something in his voice varied Buzard not to urge him. As he turned away, Alan said, in the tones of a man who has made some hard and sudden decision:

"When you've had supper, come back down here; I'll help you with that work; we'll do it now, so we can get away early. I was thinking, for this evening—something else—No, that's out."

At three o'clock the next morning

"NOW FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It cures the nervousness, restores your appetite . . . sleep better . . . relieves periodic headaches . . . backache . . . makes trying days bearable.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

W. M. 1. 1903

Buzard lifted the plane out of the Big Alouka. With Alan driving him, he headed due north.

One hundred and thirty miles away, nearly four hundred miles from Fort Endurance, a small tribe of Tsimshians lived along the western fringe of the Thl-Ashah. They were a timid, shuffling, ineffective band, shuddered into a region where other tribes scorned to live. Dave MacMillan had seen their friend and they brought him their furs; and Alan, during his years at Endurance, had sent a protective patrol to them twice a year. Joyce had found out where they were spending this summer; and Alan had a mission with their old headman, Mugwa-Ethien.

When the timber country began yielding to lakes and semi-muskeg, he got out his glasses and started searching about for their camp. At a height of five thousand feet he could sweep a region of more than two hundred thousand acres. The eyes of the wings of a bullet-winged curlew, and that big-barreled Browning machine gun—through bush and driving powder and a fall in his shoulder, he had smashed through obstacles till now he held the power and heavy odds against those bandits.

The sure knowledge of this they about all that was left to him. His work in the Mounted, his life here in the North, were both gone; and Buzard's ecstatic words had evening had showed him that his secret hope toward Joyce had been a fool's hope. The world's weight thinned.

How low he must have fallen in her estimation, that she should turn his gift to her! At first it had seemed a little of Joyce to do that. But then he looked at the incident with relentless honesty, and he could not avoid it. Once he had seen the plan to marry. People had spoken of it; it had been generally accepted along the river. She had liked him, loved him. What must her feelings have been as she watched his relations with Elizabeth, and saw him engaged to the girl and coming no more to the Big Alouka? She must have felt shame, a burning shame, at being lifted. Month after month of talk—it had been a constant rage to her girlhood. Nothing she could do to him could be so heartless as what he had done to her.

At last, the proprietor took her at last against the Indian camp, a cluster of brown leather tents beside a lake where the band was passing the summer near their fish weirs. Buzard roared over the camp and banked to alight. Old Mugwa-Ethien, a man with a wrinkled old visage, a hairy idea where those areas lay; that old headman, Mugwa-Ethien, who followed the Caribou, had lived his life along the border of that great marsh and knew it better than any man alive, and could probably give him a pretty definite idea where to find him.

After this flood season of heavy rain, Alan knew there were a few areas in the watery wilderness of the Thl-Ashah where a party of men could start life. He had a good idea of a place where those areas lay; that old headman, Mugwa-Ethien, who followed the Caribou, had lived his life along the border of that great marsh and knew it better than any man alive, and could probably give him a pretty definite idea where to find him.

Very wisely, Joyce had kept from telling the nomad bands know anything about the police defeat. The Thl-Ashah maintained order in any region of their falling and the news of their stingy defeat, would do incalculable harm. Joyce had not even told old Mugwa-Ethien.

After pleading the headman to silence, in guttural Tsimshian Alan began sketching the story of the robbery and battle. As he told of the bandits seeping up the Alouka, he noticed that the old chief suddenly became all interested.

Alan looked at him keenly. "Something," he thought, "I've stumbled onto something." He demanded: "When I saw you, three breaths ago, you started like a bolt of lightning. What was it?"

Drawing a crude map of the Thl-Ashah with his finger, the old headman sprang his astounding news.

"Ten suns ago, said, Tukook and another young band had gone westward. They had been looking for places to locate their colonies for autumn trapping. One evening they heard the boom-boom of freckles far away followed by a slipping up, timid caution, they saw some strange men shooting warlike for food. They saw a camp on an island."

For several minutes, fought him a wild idea, Alan forced himself to crouch there, asking questions, fixing that map and that spot unforgetfully in his mind.

At the wigwags he rejoined him. "Come out! Let's be getting into the air! An hour and a half from now we'll be saying it with a machine gun. When we flew up here we brought our back loads!"

From his height of three thousand feet, reading the country spread be-

keep fit! Headache, heart depression—banish them all by keeping your liver clean every morning.

TAKEN FROM FRUIT SALT

low him, Alan could follow the crude finger map without once being in doubt. . . . That should be the great blue-wake which Mugwa-Ethien had described. It should have islands in the center of it. One of the islands near the north edge of the cluster the bandits should be camped, if they had not moved on.

"Living north," he shouted at Buzard. "Those islands there in the machine answered and thundered closer. One by one Alan started to search the sky. On the first one, nothing. On the second, nothing. But on the third . . . He started suddenly as he caught that center one in clear form. Below them on that center island, conspicuous to their sky patrol, stood a solitary dirty white tent."

After a few moments Alan had presence of mind again. He lighted forward and shouted instructions: "Drop down to a thousand feet. Fly over that island again, slow. Want to study it carefully before we start now."

Buzard dropped down, swung around. As the plane sailed over a second time, Alan drew the island up to study the tent sharply. He saw a movement of the flap-front and distinguished a man's face, upturned, peering at them.

One been on at least! But the others? . . .

A guess shot into his mind: those others had probably gone hunting for caribou over east at the fovea.

As though that watcher there below realized what this ominous danger meant and had become panicky, a puff of white, a single puff, burst from the flap-front. Confident the man was alone and the others were gone, Alan decided to take this bait. He needed information about the others, and information about the flap of furs to catch Dave MacMillan.

While Buzard circled at a safe distance, he tore a page from a memo book and scribbled on it. "If you shoot again, we'll split your tent and that island into the lake with our machine guns. Stand out in the clear. No more on you. Don't try any crooked move after we light."

He wrapped the message around a musky-wrapped, handed it to Buzard, and then, from a tin of dropping "eggs" on ammunition dumps and second-trench Flammenwerfer and concentrated the message of Krupp 7 1/2 inch of Verdun, with no aerial sights except two nails and a string along the fuselage, Buzard was a good judge of speed, attitude and the right split-instant to release. Whirling over the island, a few hundred yards up, he planned the man's white in a dozen paces of the flap-front.

As they looked back they saw the man run out to it, read the message, hesitate a moment, and then raise his left arm, waving something white.

A pistol-shot off the island the man's lighted. Buzard stayed in the machine, Alan and his men out on the canvas canoe, slipped automatic rifles into their pockets, took rifles promptly to the water. Why? "What?"

While Buzard searched the bandit for a hidden revolver, Alan looked at him curiously. He was a strange character. He had been a soldier, a soldier, his skin olive, he looked as he had oriental blood in his right arm dangled limp at his side.

Alan demanded, "Are you the fellow we hit in that fight?"

"Chink" Woolley nodded.

"Are those other men out hunting?" Alan asked, "or where?"

Woolley batted his eyes slowly, as though talking thought. "Hustle," he said.

"Which way did you want to go?"

"North-east."

(To Be Continued.)

There are many metals lighter than aluminum. The lightest of all, lithium, will float on water like a cork.

The collection of refuse costs London \$4,000,000 annually.

High Above the Clouds

Ten Ballons Sent Up From Airport At Calgary

Calgary's knowledge of conditions in the stratosphere, where the clouds have been enriched by recovery of nine of 16 meteorological balloons sent up from the Calgary airport since last August.

Announcement of the recovery of the balloons was made by Lieut.-Commander Henry, representative of the Dominion meteorological service at Calgary, who released two of the balloons each month. The tests in conjunction with other work being carried on as Canada's share in the international polar year investigations, will be continued until the close of the polar year in August of this year.

Nine miles above the earth—a mile strip of the height reached by Professor Auguste Piccard in his balloon ascent to investigate the stratosphere—was the highest any of the balloons released here reached. Some expanded and burst when only three miles high, but the average altitude reached was 40,000 feet—almost eight miles.

"Living north," he shouted at Buzard. "Those islands there in the machine answered and thundered closer. One by one Alan started to search the sky. On the first one, nothing. On the second, nothing. But on the third . . . He started suddenly as he caught that center one in clear form. Below them on that center island, conspicuous to their sky patrol, stood a solitary dirty white tent."

After a few moments Alan had presence of mind again. He lighted forward and shouted instructions: "Drop down to a thousand feet. Fly over that island again, slow. Want to study it carefully before we start now."

Contentment Without Riches

Man Found Peace In Life After Fortune Was Gone

In Newton, Iowa, is a man, Frank F. Falter, 74, who has lived three lives.

At 27 he was known as the richest cattle and purchased swine breeder in the middle west. He was a tanner, topper, drove fast horses, and to order his neighbors beyond possible doubt, hired negro servants to wait on him. That was Life No. 1.

Shortly his success faded. He became penniless, and turned keener, a man disgraced with life, gloomy and seared with mankind. That was Life No. 2.

He became interested in religion and began to practise it conscientiously. His interests broadened and he started growing flowers about his little shack. He had started Life No. 3.

Today, tucked away among the gleaming, glass roofs of greenhouses at the outskirts of Newton is the same shack. It has been no built over and around with flower houses and other buildings devoted to horticulture and gardening that few persons realize its presence.

Falter still lives in the shack, all alone, but in no modest manner, but by the financial yardstick, than he ever was in Life No. 1.

Falter said he had learned that success and failure, after all, were relative matters, but that peace of mind and happiness were important fragments of from which every person owed to himself.

Little Helps For This Week

"This God is our God ever and ever; He will be our guide even unto death."—Psalm 137:8.

He still may say; Thy God thou understand; To guide the future as He has the past; Thy high thy confidence let nothing shake; All our mysterious shall be bright at last."—J. Burleigh.

He has kept and folded us from ten thousand hills when we did not know it. In the midst of our security we should have perceived every hour but that He sheltered us "from the terror by night and the arrow that came by day, the pestilence that walketh in darkness, from snares of our own evil will. He has kept us even from ourselves and saved us from our own undoing. Let us read the traces of His hand in all our ways, in all the events, the minor and the major, that mark the state. It is His that feeds and feeds us that makes us to go in and out—to be faint or fed pasture, to the down by the stars, or to walk by the way that is parched and desert—It is E. Manning.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can't be run on kerosene or kerosene. Milk and fat are not the only products that make it easy to care for their life. Mrs. Thos. Palmer of the U.S. Dept. of Agriculture says, "With a lump in her udder, it's difficult to milk. It's a nuisance, and it's soon got better."

Minard's is best for Cows, Brucella, Colic, Diarrhea, etc., and equal good in "stable or house." Well named "King of Pain."

Reciprocal Trade Agreement

Tariff Concessions Between Great Britain and Germany Over Limited Field

Reciprocal trade and tariff concessions between Germany and Great Britain were announced recently. The new tariff schedule for Germany was being nearly doubled and in the United Kingdom, making tariff concessions over a limited field.

The announcement of arrangements of increased trade with Germany follows an earlier statement declaring a new trade agreement with Denmark by which Great Britain's market in Danish goods for industrial products will be greatly increased to Danish for increased quotas granted to Danish dairy and agricultural products.

Not So Ignorant

Small Boy—"Don't think the gentleman next door knows much about me."

Mother—"Why?"

Small Boy—"Well, he told me this morning to cut my drum open and what was inside it."

A little vinegar sprinkled in your white skin and left for a few minutes will be washed off will you move rust stains.

Glasgow has a public graft scandal.

Friendship Tours Organized

"Friendship Tours," organized overseas will bring parties of British women to Canada and the United States to the International Congress of Women and the World's Fair at Chicago in July, according to word received at the Canadian National Railways Passenger Department, Montreal. Information indicates that about 200 British women will join the tours.

In a battle of tongues, a woman rarely loses her own.

Rheumatism

Is caused by failure of kidneys to filter out poisons from the blood. One Pill relieves by neutralizing the acids and restoring the kidneys to normal, causing no injury, but at all druggists.

MADE IN CANADA

Slaughter Of Wild Life

Man's Love Of Sport and Woman's Vanity Are Blamed

Dr. A. H. B. Kirkman, secretary for life, University of London, in Animal Welfare Society, speaking at a meeting recently, entered a protest against cruelty to animals and birds. He said, "The world is a dying place, egg collectors and certain unscrupulous medical purposes were to blame, he said, for cruelty to millions of numbers of animals and birds."

There were at least 100,000,000 pellets entering the different markets of the world, including the United States and Australia, in 1928, and 3,500,000 skins were exported from Australia alone, and sent to civilized countries to be used for certain medical purposes which are absolutely unnecessary, and a dying race of animals for the most part."

Curse Of High Criffs

World Has Been Going Crazy Over Raising Trade Barriers

Tariffs throughout the world must come down, Hon. R. J. Manion, Minister of Railways and Canada, said in the House of Commons recently. Action, however, must be taken on a world-wide basis, including the railway earnings to trade barriers and the minister agreed the reopening of channels of trade now closed would give the railway business a better chance.

May Have New Industry

Musilage Likely To Be Made from Manitoba Black Poplar

Making of musilage from black poplar may be the next development of Manitoba's natural resources. The Balm of Gilead tree, widespread in Manitoba, contains large quantities of gum which may serve as a basis for adhesive. The forest committee of the industrial development board has been authorized to carry out tests on using the product commercially.

Interesting Local Items

Mr. Orrie Ferns has been appointed a commissioner for cats.

Owing to the heavy demands made on Canadian Legion funds the past year, there will be no Dominion convention this year.

Mr. H.J. Cox attended the annual meeting of the S. O. E. Lodge held in Calgary last week end.

Mrs. Vogstadt has left for Peace River to visit her son who has just been made the father of twin boys.

A. McGimpsey is now comfortably located in his new stand on Broadway. Although the building is not completed the finishing touches will be added as soon as possible.

St. Mary's Altar Society will hold a whist drive and sale of work, also afternoon tea, on May 24th in the I.O.B.F. hall. A crib quilt will be drawn for on this occasion.

Colin Jackson, winner of the solo event for boys under 11 years, at the Medicine Hat School Festival on May 5th has also been successful in securing the highest award in this class at the Lethbridge Festival held last week.

I have secured the agency for the famous Watkins line of goods and hope to have the pleasure of calling on the citizens of Redcliff and district some time in the immediate future. Wait for me.
W. J. Cooper Redcliff

At the general monthly meeting of the local Legion held last Friday evening Bert Allison was elected vice president and W. Hill was elected to the entertainment committee. A number of members from the Medicine Hat Legion were present at the meeting.

BIRTHS

Rodman—In the hospital on Friday, May 12th 1933 to Mr. and Mrs. R. Rodman, a daughter.

FOR SALE—A tennis racquet with press. Both in good condition. Apply to G. Abbott.

Two-year-old Richard Braconier, of Duchess was drowned in the C. P. R. spillway near Brooks last Sunday.

Choice night at New Dreamland. Your choice of any one of the dinnerware pieces they have on hand.

Mrs. McLachlan, her son Ross and her two daughters, Mrs. Rand and Mrs. Raincock left by motor last Thursday for Summerland B. C. Mrs. McLachlan and Ross will visit Mrs. Rand there for a few weeks.

Quite a number of Walton's disciples in town were out for the opening of the fishing season last Tuesday. Several parties were arranged to make a raid on the surrounding lakes and rivers and some good catches are reported.

CRICKET MEETING

Apparently there are a number of cricket enthusiasts in town. There is also an almost complete outfit to start a club. With the object of starting the ball polling a meeting will be held in the Legion Club rooms on Friday evening of this week at 8 o'clock. All interested in the game and in organizing a club here are invited to attend.
